

ROLLER CONVEYORS

ROLLER CONVEYORS

- Solid construction;
- Available with PVC or Bright Zinc Rollers;
- Easy running rollers;
- Available with special rubber sleeve (to dampen the noise created by the impact of the baggage onto the rollers);
- Available in powder painted finish, stainless steel or galvanized (for special requirements).

Either we talk about the primary screening area for the passengers or we talk about the Baggage Handling System there are areas where Roller Conveyors are required for manual transfer of baggages or accumulation.

Low noise

Ajustable configuration according to existing layout

High capacity transport
